

Scenario1: (Week) Generate the test cases to verify file upload functionality

Output:

File Upload Functionality – Test Cases

TC ID	Test Scenario	Test Steps	Expected Result	Priority
FU_001	Verify file upload option is displayed	Navigate to upload screen	Upload control should be visible	High
FU_002	Verify single file upload	Upload one valid file	File should upload successfully	High
FU_003	Verify multiple file upload	Upload multiple valid files	All files should upload successfully	High
FU_004	Verify upload button functionality	Click Upload button after selecting file	Upload process should start	High
FU_005	Verify drag-and-drop upload	Drag a valid file into upload area	File should upload successfully	Medium
FU_006	Verify upload progress indicator	Upload a large file	Progress bar/message should be displayed	Medium
FU_007	Verify successful upload message	Upload valid file	Success message should appear	High
FU_008	Verify uploaded file name display	Upload file	Correct file name should be displayed	Medium
FU_009	Verify uploaded file size display	Upload file	Correct file size should be displayed	Medium
FU_010	Verify upload timestamp	Upload file	Upload time should be captured correctly	Low
FU_011	Verify PDF file upload	Upload .pdf file	File should upload successfully	High
FU_012	Verify Excel file upload	Upload .xls or .xlsx file	File should upload successfully	High

TC ID	Test Scenario	Test Steps	Expected Result	Priority
FU_013	Verify Word document upload	Upload .doc or .docx file	File should upload successfully	High
FU_014	Verify JPEG image upload	Upload .jpeg file	File should upload successfully	High
FU_015	Verify JPG image upload	Upload .jpg file	File should upload successfully	High
FU_016	Verify PNG image upload	Upload .png file	File should upload successfully	High
FU_017	Verify unsupported GIF file upload	Upload .gif file	System should reject file with appropriate error message	High
FU_018	Verify BMP file upload restriction	Upload .bmp file	Upload should be blocked	High
FU_019	Verify TIFF file upload restriction	Upload .tiff file	Upload should be blocked	High
FU_020	Verify MP4 video upload restriction	Upload .mp4 file	Upload should be rejected	Critical
FU_021	Verify AVI video upload restriction	Upload .avi file	Upload should be rejected	Critical
FU_022	Verify MOV video upload restriction	Upload .mov file	Upload should be rejected	Critical
FU_023	Verify upload of executable file	Upload .exe file	Upload should be blocked	Critical
FU_024	Verify upload of ZIP file	Upload .zip file	Upload should be rejected if unsupported	High
FU_025	Verify upload with maximum allowed file size	Upload file equal to size limit	Upload should succeed	High

TC ID	Test Scenario	Test Steps	Expected Result	Priority
FU_026	Verify upload exceeding file size limit	Upload file larger than allowed size	Error message should be displayed	Critical
FU_027	Verify empty file upload	Upload 0 KB file	System behavior should follow requirements (accept/reject)	Medium
FU_028	Verify special characters in filename	Upload file with special characters	File should be handled correctly	Medium
FU_029	Verify long filename upload	Upload file with maximum filename length	Upload should work correctly	Medium
FU_030	Verify duplicate file upload	Upload same file twice	Application should behave as per requirement	Medium
FU_031	Verify upload cancellation	Cancel upload during progress	Upload should stop successfully	Medium
FU_032	Verify remove uploaded file	Delete uploaded file from list	File should be removed successfully	Medium
FU_033	Verify upload after removing file	Remove file and upload again	Upload should work successfully	Medium
FU_034	Verify upload without selecting a file	Click Upload without choosing file	Validation message should appear	High
FU_035	Verify network interruption during upload	Disconnect network during upload	Proper error message should be displayed	High
FU_036	Verify retry upload after failure	Retry failed upload	Upload should complete successfully	Medium
FU_037	Verify browser refresh during upload	Refresh page while uploading	System should handle interruption appropriately	Medium

TC ID	Test Scenario	Test Steps	Expected Result	Priority
FU_038	Verify upload session timeout	Keep upload screen idle and upload file after session expiry	Appropriate timeout message should appear	Medium
FU_039	Verify simultaneous uploads	Upload multiple files concurrently	System should process uploads correctly	Medium
FU_040	Verify upload performance	Upload large file	Upload should complete within acceptable time	Medium
FU_041	Verify virus-infected file upload	Upload infected file	System should block upload and display error	Critical
FU_042	Verify file corruption after upload	Upload and download file	Downloaded file should not be corrupted	High
FU_043	Verify MIME type validation	Change file extension and upload unsupported content	Actual content type should be validated	Critical
FU_044	Verify malicious script file upload	Upload .js, .bat, or script files	Upload should be rejected	Critical
FU_045	Verify SQL injection in filename	Upload file with SQL keywords in name	Application should remain secure	Critical
FU_046	Verify XSS attack in filename	Upload file containing HTML/JavaScript tags in name	Input should be sanitized	Critical
FU_047	Verify Unicode filename upload	Upload file with Unicode characters	File should be uploaded successfully	Medium
FU_048	Verify upload using different browsers	Upload file from Chrome, Edge, Firefox	Functionality should work consistently	High
FU_049	Verify upload from mobile devices	Upload file from Android/iOS browser	Upload should work properly	Medium
FU_050	Verify uploaded file persistence	Reopen page after upload	Uploaded file should persist according to business requirement	Medium

Boundary Test Cases

TC ID	Scenario	Expected Result
FU_051	Upload minimum file size	Upload should succeed
FU_052	Upload maximum filename length	Upload should succeed
FU_053	Upload filename exceeding limit	Validation error should appear
FU_054	Upload exactly maximum number of files allowed	Upload should succeed
FU_055	Upload more than maximum number of files	System should reject additional files
FU_056	Upload files whose total size equals limit	Upload should succeed
FU_057	Upload files whose cumulative size exceeds limit	Error message should be displayed

Negative Test Cases

TC ID	Scenario	Expected Result
FU_058	Upload corrupted PDF	System should reject or show error
FU_059	Rename video file to .pdf and upload	Upload should fail due to MIME validation
FU_060	Upload password-protected file	System should behave according to requirement
FU_061	Upload unsupported extension with valid MIME type	Upload should be rejected
FU_062	Upload file while server is unavailable	Appropriate error message should be displayed
FU_063	Upload same file repeatedly in quick succession	Application should handle gracefully
FU_064	Upload file containing non-ASCII characters	Upload should succeed

TC ID	Scenario	Expected Result
FU_065	Upload file with leading/trailing spaces in filename	Filename should be handled correctly

These test cases cover **functional, validation, boundary, negative, security, performance,** and **compatibility** scenarios for file upload functionality.

Scenario1: (Strong Prompt using ICEPOT)

Context:

Act as a Senior Software Test Engineer for a Supply chain domain and e-commerce application

Instruction:

[MANDATORY] Generate testcases for testing File upload functionality

[MANDATORY] File upload should support PDF, Excel, Word, Image

[STRICT] Should accept image formats of JPEG, PNG only

[CRITICAL] Should not allow video formats

[STRICT] Should allow only 5 files for upload

[CRITICAL] Cumulative file size of all files should not exceed 50MB

[MANDATORY] Each file size should not exceed 10MB

[MANDATORY] Include Postive and negative cases

Example:

TCID	Description	Priority	FileType	No. of files uploaded	Steps	Expected Result
------	-------------	----------	----------	-----------------------	-------	-----------------

Persona:

Act as a Test lead to review the testcases for accuracy

Output:

Create a Downloadable excel format

Tone:

Professional Tone with clarity

Output:

File_Upload_Test_Cases.xlsx
